

Latest Releases & Product News from Copia

SPARES TODAY...

WE HAVE YOUR SPARE Diva Server

Order today! Before the end of the year and while Supplies last!

For a limited time we have the Diva Server T1/PRI-24 boards available for \$9,608. This board still has full fax capability at a speed of 33,600. These boards will be available next year BUT with half the fax line capacity and reduced speed from 33,600 to 14,400 AND remain the same price. This price is a steal, since the alternative board in 2009 would be the Brooktrout 1034 T1 but at a cost at \$17,500. The board functionality also affects Diva analog users and you too should purchase spares!

If your system depends on it, you can't ignore this offer.

Fax Over The Internet (FoIP)

Now's your opportunity! This offer is open to current Copia End Users and Resellers only.

Copia has partnered with Commetrex to bring you this boardless introductory offer. This is a full featured Copia two-line fax server with five (5) desktop clients and the Commetrex Bladeware base license of 2 lines of software that supports T.38/G711. No hardware necessary. Included is three (3) months of setup and support help. This boardless fax server uses SIP trunks with DNIS-to-email support for inbound faxes. You will need your own SIP provider that supports T.38 and we are recommending Teliix. When signing up with Teliix, please use Special Offer Code 64601965. Experience this IP fax server solution(retail value \$3360) for just \$439.00, a special NFR price that includes J2 Patent License (J2 does not apply to service bureaus). At this time we believe international customers can be supported but you should check local laws.

Wishing everyone a joyous season!
We will be closed December 25th, 26th
and January 1st, 2nd

Merry Christmas
